

Hi Parents,

Please see some instruction below to create and connect your parent Canvas account with your child.

Please note, you will need your child with you and have their Pairing Code in their Canvas account ready to go.

Student Side:

1. Log-in to Canvas
2. Go to "Account" and then "Settings"
3. On the right-hand side, you will see "Ways to Connect" and "Other Contacts". Under other contacts, click / tap on "Pair with Observer" (see image below)
4. A one-time code will be created which the observer (Parent) will need to create an account.

Note: do not close the generated code until the observer has completed the registration process.

Start Participating

This will bond the observer with the student to which you'll see via the Canvas Parent App. You "can" use Parent Orbit app to get there, however, my encouragement would be to download the Canvas Parent App from the App Store and it's a much fluid experience.

If you encounter any issues pairing, please submit a request to servicedesk@hunterchristian.nsw.edu.au and the ICT department will assist as soon as possible.
